SUMMARY

Software Engineer with 3 years of experience building scalable web applications and enterprise-grade backend systems. Proficient in TypeScript, React, Node.js, and Python, with hands-on experience designing RESTful and GraphQL APIs, automating backend workflows, and optimizing Web Vitals for production environments. Adept at architecting modular UI systems, implementing complex state management, and delivering data-driven solutions in Agile/Scrum teams. Passionate about writing clean, maintainable code that solves real business problems.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Tailwind CSS

Backend: Node.js, Express.js, Python, Java, REST API Design, GraphQL

Databases: PostgreSQL, MySQL, MongoDB

Tools & DevOps: Git, Docker, CI/CD Pipelines, Vite, Webpack, Jira

Authentication & APIs: JWT, OAuth, RESTful Services, Webhooks

Testing & Methodologies: JUnit, TDD, BDD, Agile/Scrum, Unit Testing, Web Accessibility (ADA)

WORK EXPERIENCE

Associate Software Engineer 2025 - 2026

Glancito Remote

- **Development:** Built high-performance web applications using TypeScript, JavaScript (ES6+), React, and Node.js, with a focus on modular architecture and reusable component libraries.
- **Backend Automation with Python & Node.js:** Developed backend automation scripts in Python and Node.js for customer segmentation workflows, data processing pipelines, and conditional business logic reducing manual operations significantly.
- **API Integration:** Designed and implemented RESTful and GraphQL API integrations to maintain real-time data consistency between frontend state and backend databases.
- **State Management & Performance:** Architected frontend state management using React Hooks and asynchronous AJAX requests, delivering highly responsive UI under heavy data loads.
- **Loyalty System Architecture:** Built a loyalty management system from scratch, including reward point calculation logic based on complex pricing algorithms and secure API endpoints.
- **Performance Optimization:** Ran in-depth Web Vitals audits, optimizing DOM rendering, minimizing bundle sizes, and ensuring cross-browser compatibility.
- **AI-Powered Features:** Integrated third-party AI APIs to build content generation modules that automate personalized marketing campaign creation. Leveraged AI-assisted development workflows to accelerate implementation and improve developer productivity.
- **Agile Collaboration:** Worked closely with designers and backend engineers in a Scrum workflow to ship secure, production-ready features. Participated in BDD-oriented requirement discussions to deliver governed, ADA-compliant user experiences for AI-driven applications and automated conversational workflows.

Programmer 2022 - 2024
Cognizant Technology Solutions Bangalore

- **BPM Development:** Developed end-to-end case life cycles for Insurance and Banking applications using Pega BPM, ensuring scalability and maintainability across enterprise systems.
- **API & Data Integration:** Integrated REST and SOAP services using Connect SQL and REST connectors, improving data synchronization and customer record management.
- **Data Engineering:** Implemented Data Transforms and Data Pages that improved data accuracy and operational efficiency across business workflows.
- **UI Development:** Designed Business Process Flows, Flow Actions, and UI components using HTML, CSS, and JavaScript to enhance user experience.
- **Security & Access Management:** Defined Access Groups, Roles, and Privileges to enforce secure, role-based application access.
- **Performance Debugging:** Optimized application performance using Pega declarative rules and debugging tools including Tracer, Live UI, and Clipboard.
- **Agile & TDD:** Delivered work in Agile/Scrum sprints with JUnit-based test-driven development practices.

EDUCATION

Master of Computer Applications (8.55) 2023 - 2025
Kalasalingam Academy of Research and Education

Bachelor of Science in Computer Science (8.02) 2019 - 2022
Kalasalingam Academy of Research and Education

CERTIFICATIONS

- **Pega Certified System Architect** - Pegasystems
- **Pega Certified Senior System Architect** - Pegasystems
- **Generative AI Fundamentals -** Cognizant
- **SQL for Beginners** – Udemy
- **The Fundamentals of Digital Marketing** - Google Digital Garage
- **Data Analytics and Visualization** - Forage
- **Agile methodology and Jira software tool –** Kare
